INTERNSHIPS

FULL STACK - Better Tomorrow 2024

Completed a MERN stack internship, contributing to the development of user-friendly and innovative web applications. Gained practical experience in building responsive, dynamic websites using MERN. Confident in applying MERN skills to real-world projects and ready to grow in a professional development role.

PROJECTS

EcoTrack- Smart Waste Collection System 2025

A smart waste management system that integrates IoT and route optimization to improve the efficiency of garbage collection trucks. The system enables real-time bin monitoring, cloud-based dashboards, and optimized routes using OpenStreetMap, reducing fuel consumption and preventing overflow.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, OpenStreetMap, REST API.

NeighborConnect-Neighborhood Support System 2025

A web-based platform designed to connect people within a local area to request and offer assistance. The system enables users to post help requests (food, medicine, transport, tutoring, etc.), browse available requests, and volunteer to assist. It includes JWT-based authentication, request management, a messaging system, and an admin dashboard, fostering real-time community support and collaboration.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, REST API.

Bluetooth-Based Grass Cutter(Patented) 2024

Developed an IoT-based automatic lawn mower to reduce manual labor and improve grass-cutting precision. Features eco-friendly, low-power operation and smartphone-controlled Bluetooth interface, offering a smart and efficient solution for home and commercial landscaping.
